

Project Number: 2016-1-RO01-KA203-024630

Communicating with Parents

Practical Activity: Simple language and expressive communication

Problem addressed: how to explain complex issues in an understandable way; parents who only understand simple language/doctors using medical jargon

Soft skill: **Simple language, Expressive communication**

Method: **Role-play**

- 1) Participants form teams of 4. Every team is given a description of a medical condition (teams can receive the same condition or every team a different one or teams can also receive several descriptions – at the end of the exercise all will be comparable). The teams have to transform the description to an easily understandable written/oral text. Team members have to find an expressive image which can illustrate the condition.
- 2) Teams present their solution to the other teams and they evaluate together the solutions.
