Communicating with Peers

Practical Activity: Discussing a Decision with Nurses

- Problem addressed: discussing a decision with nurses
- Soft skill: solving conflicts, leadership
- Method: role-playing

A doctor tells the nurse that it is necessary to extract an analytic and the nurse opposes claiming that it is not necessary since she sees the patient is well clinically. It is about getting the nurse to understand the need to perform the analysis because it is important to have a control before discharge. It is necessary to show understanding because it supposes to add a task to the nurse, but making clear that the one that has to make these decisions is the physician.
